PROJECT EXPERIENCE

MASTER'S PROJECT: Bid Management System

- The bidding process is real time. Data in the database would be updated in real time and visible to users in real time.
- It enables the suppliers to get all the tender details online and provide facility to bid on particular tenders.
- This project was developed using J2EE and Oracle.

DEGREE PROJECT: Library Management

- The user can Add books, groups, Issue and Return books, view book report, customer details, rented book's details. The user should also provide all the information about the book/customer such as Book/group id, name, publisher, author, year, edition, price, status, etc.
- This project was developed using VB.NET.
